EDUCATION

Computer Programming and Analysis   Jan 2022 - Present

Seneca College - Newnham Campus - North York, ON
- **Cumulative GPA:** 3.7/4.0

Certification*: MS.OFFICE XP & BASIC WITH CCC*

PROJECTS

Design and Create a Database
Environment: SQL - Oracle 12c
- Analyzed and listed an Entity - Attribute List for a commercial business.
- Normalized the list to produce a relational database design.
- Created a Crow's Foot Notation ERD that reflects the final design.
- Created a database using Oracle 12c and added the tables and its attributes with their specific datatype, field size and the constraints.

Managing Appointments Application
Environment: C++
- Using an object-oriented programming language (C++), developed an application that allow users to book, cancel, and reschedule appointments for a Hospital.
- Implemented complex functions and classes.
- The program can read or write to a text file.
- Designed and wrote code in MS Visual Studio IDE and used some of the main C++ libraries to add further functionality to the program.

Personal Portfolio Website
Environment: HTML, CSS, JavaScript

- Created a dynamic webpage about myself.
- Created website skeleton in HTML, added styles using CSS and used JavaScript to add functionality.
- My site uses elements of a Responsive Design so that it work equally well, and optimize space and sizes, on both desktop screens and mobile phones.
- Used GITHUB for implementation of Static Hosting so that my webpage can be viewed online.
